

6.3.3 Calling ships

A calling ship is a ship arriving for the purpose of taking on fuel. It will not be landing or loading cargo. Calling ships from non-Union ports are not required to clear outwards unless they have shipped bonded or drawback stores.

“Bonded stores” are goods delivered duty free from a bonded store for shipment on vessels departing on foreign voyages beyond State waters. There are special provisions for fishing boats.

“Drawback stores” are goods which were duty paid on importation and subsequently re-exported as ships stores. They must not have been used while in the country. A drawback on the duties paid at importation is allowable.

Instructions on Ships Stores are contained in the [Ship Stores Manual](#).

6.4 Outward clearance required

All vessels other than these mentioned at paragraph 6.3 are required to clear outwards. Where outward clearance is required, a General Declaration Outwards ([IMO FAL Form 1](#)), must be presented in duplicate to Revenue. A copy of this form, when signed and date-stamped by the relevant officer, constitutes the clearance outwards of the ship and is the authority for it to depart.

The Master or any person authorised by them must, if required, attend, and answer all questions put to them by such officer relating to the ship, its cargo or the voyage.

Before issuing the clearance, the officer is to append to the General Declaration Outwards the copy of the ships stores ([IMO FAL Form 3](#)), duly noted with particulars of any duty-free stores that were allowed to be taken on board, which was delivered with the inwards report of the ship. However, clearance is not to be refused because the shipping bills or shipping notes for stores have not been returned with certificates of shipment from the shipping officers. Clearance documents granted at a second or any subsequent ports of call are to be attached to the clearance documents granted at the first port.
